	Normal process (2)		Any bleach allowed (u)		Tumble drying possible (a)		Max. 200° C (v)		Prof. dry-cleaning in tertrachlorethene (w)
	Normal process (3)		Only oxygen/Non-chlorine bleach allowed (i)		Tumble drying possible - Low temperature (s)		Max. 150° C (b)		Gentle process (E)
	Normal process (4)		Do not bleach (o)		Do not tumbly dry (d)		Max. 110° (n)		Very mild process (R)
	Gentle process (5)	ETITEX GINETEX BELGIUM vzw European House of Textile - Montoyerstraat 24 - 1000 BRUSSELS  The care labeling system is intended to supply consumers with correct information of the care treatment of textile products, so that the processes indicated on the label will avoid any irreversible damage of the product. The ciphers in the washtub specify the maximum temperature in °C which must not be exceeded. The bar underneath indicates a milder care treatment with reduction of mechanical action, of washing time, by higher water levels, smaller loads, a cool down or combinations thereof and reduced spinning. The five basic pictograms used is subject of international trademarks N° 211.247 and N° 492.423 registered with the World Intellectual Property Organization					Do not iron (m)		Professional dry-cleaning in hydrocarbons(T)
	Normal process (8)						Gentle process (Z)		
	Gentle process (9)						Do not dry-clean (U)		
	Normal process (w)						Professional wet-cleaning (I)		
	Gentle process (e)						Gentle process (O)		
	Very mild process (r)						Very mild process (P)		
	Hand wash (t)						Do not wet-clean (A)		
	Do not wash (z)
